

Environmental Statement

HETA is committed to protecting the environment and minimising its environmental impact.

To do this, we will comply with legal and other requirements; prevent pollution of land and water courses; strive to reduce our use of resources, and continually improve our environmental performance.

These aims are communicated to all employees and others working on behalf of HETA, and are available to external interested parties via this website.

Should anyone have any concerns regarding our environmental impact or performance, they should contact the relevant HETA Site Manager at the addresses shown in the “contact” page of the website.
